CAREER OBJECTIVE

Enthusiastic and detail-oriented developer with practical experience in Python and Web Development, alongside strong foundations in HTML, CSS, and JavaScript. Eager to contribute to scalable web application development and AI-driven solutions. Passionate about growing in fast-paced engineering teams while delivering impactful applications with a strong focus on problem-solving and continuous learning.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

Web Technologies: HTML5, CSS3, Django (Basics)

Libraries / Tools: NumPy, Pandas, Scikit-learn, OpenCV, Git, GitHub, VS Code

Core Concepts: OOP, DBMS, Computer Vision, NLP, Machine Learning

Soft Skills: Fast Learning, Problem Solving, Team Collaboration, Effective Communication

PROJECTS

Real-Time Traffic Surveillance and Detection Using Deep Learning:

2025

Tech Stack: Python · NumPy · Pandas · Scikit-learn

- Built a real-time computer vision system using Python, OpenCV, and CNN deep learning models to classify vehicle density across traffic lanes, achieving ~92% detection accuracy.
- Implemented Canny edge detection and digital image preprocessing pipeline to dynamically adjust traffic signal timings, reducing simulated congestion by ~30%
- Validated system through hardware implementation, demonstrating improved traffic flow, reduced average vehicle wait time, and lower fuel consumption.

Kid Watch AI – Sentiment Monitoring & Content Filtering of YouTube Videos for Children: 2026

Tech Stack: Python · NLP · Sentiment Analysis · Django

- Designed and deployed an AI-powered NLP machine learning pipeline to monitor and filter YouTube video comments targeting children, processing 10,000+ comments with 87% classification accuracy.
- Implemented tokenization and stemming preprocessing techniques to classify comments into positive/negative sentiment using Python and Scikit-learn.
- Reduced false positive filtering rate by 20%, enhancing platform safety without over-blocking legitimate content.

EXPERIENCE

Python Development Intern – Cognifyz Technologies

Sep 2025 – Oct 2025

- Demonstrated strong dedication and problem-solving skills while completing Python development assignments, delivering clean and well-structured code.
- Exhibited exceptional coordination and communication abilities, effectively collaborating on development tasks across the project lifecycle.
- Showcased strong attention to detail and a passion for acquiring new technical skills, consistently approaching challenges with enthusiasm.

Web Development Intern – Cognifyz Technologies

Dec 2025 – Jan 2026

- Built and refined web applications using HTML5, CSS3, and Django, approaching new challenges with enthusiasm and a strong desire to learn.
- Applied web development principles to deliver high-quality, functional output with remarkable sincerity, attention to detail, and commitment.
- Strengthened technical and coordination skills throughout the internship, demonstrating consistent growth and effective communication with the team.

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate

Oct 2025

Oracle University · Valid until Oct 2027 · Cert ID: 103012388OCI25AICFA

Python Bootcamp

LetsUpgrade · In collaboration with NSDC, ITM Edutech & GDG MAD · Cert No: LUEPYTOCT020

EDUCATION

B.Tech – Computer Science Engineering (CSE) CGPA – 8.0

2022 – 2026

Malla Reddy Institute of Technology and Sciences

STRENGTHS

- Strong analytical and logical thinking ability
- Quick learner and adaptable to new technologies
- Team-oriented with good communication skills
